

**NEW! Major Breakthrough in
Production Chemicals Management.
Reduce Inventory, Save Money.**

**REPLACE Hazardous Chemicals Minimise Health, Safety
and Environmental Impact. Help contribute to Cleaning
the Planet while increasing Efficiency & Productivity**

PMI-SC3/Problem Specific

- Scavenger H₂S
- Scavenger Sulphides
- Scavenger Mercaptans
- Scavenger RSH
- Scavenges Liquid & Gas Phases
- Has none of the hazards associated with triazine or formaldehyde

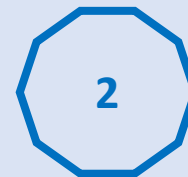

UNIQUE – MORE COST EFFECTIVE use of PRODUCTION CHEMICALS

All our products are compatible, so can be mixed in any variation to combat all, oil/gas/pipeline/well production issues, both on & offshore, with one effective dosing regime. “Multiple” injections of different chemicals for different problems become a thing of the past

Product Groups

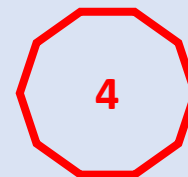

Inhibitors – Wax, Asphaltene
Corrosion, Drag Reducers,
Demulsifiers, Enhanced Recovery

Solvents – Wax, Asphaltene,
Tar/Bitumen, Paraffins, Drag
Reducers, Enhanced Recovery

Descalers – Calcite, Carbonate,
Aragonite, Valterite, Anhydrite, Gypsum,
Barite, Celestite, Mackinawite, Pyrite,
Haltite, Fluorite, Sphaerlite, Galena, Iron
Sulphide, Strontium, Barium, Calcium
Zinc Sulphide, Lead Sulphide

Scavengers – H₂S, Mercaptans,
Sulphurs, Oxygen, Toxic Gasses

Biocides – SRB's, SOB's, Iron,
Fermentation, Bacteria's
Bacillus, Lactobacter,
Arthrobacter, Pseudomonas,
Micrococcus, Zoopage,
Articulosporium. Bacillus sp &
many more.
